“This People’s Heart has grown Sluggish.” (Acts 28:27)

Assisted Suicide

Six Things You Need To Know

There is law, promotion, reality, and truth, some of which are hard to come by. In this [article](#), Nancy Valko strikes at the core issues. They include pain and suffering, professional immunity and accountability, documentation, falsified death certificates, and discrimination.

It really is things all of us need to know.

Unsafe

A myth promoted by abortion supporters: “Without legal abortion, women will resort to unsafe, back-alley abortions”. The key word here is “unsafe”.

There is a pro-abortion group, [Medical Students For Choice \(MSFC\)](#), planning ahead for the day when abortion becomes illegal. [Their plan is to teach doctors how to perform abortions with a “stealth kit”](#). Their workshops are conducted for doctors in training,

The “stealth kit”, is already in use in Africa where abortion is illegal. The kit contains the tools needed to perform an abortion in a remote area where there is no electricity or medical facilities. And this workshop may be the only training available to produce future abortionists.

Also, [pro-abortion groups are promoting the use of mail-order abortion drugs](#) to self-induce abortion or by others to secretly induce abortion in a woman who refuses abortion. These leave the woman without medical supervision.

Simply, these are “back alley” abortion kits.

The concept is to revert to procedures which were the original “justification” for legalizing abortion and were part of the basis of Roe v. Wade. Their own myth (above) declares these procedures “unsafe”.

There really are no limits to which pro-abortion supporters will go to ensure they can continue to kill unborn babies.

Twisted Words

If you hear an expression or a phrase often enough it becomes “normal” and minimized in its impact. Most teenagers cannot say ten words without including “like”. It is meaningless and unnecessary but has become so common that like everyone seems to include it in like their speech.

So it is with the words fetus, blob of tissue, choice, woman’s right, terminate, and so many others. And with the help of a complicit media, these words have lost their meaning and impact.

These redefined words have like diminished our countries’ sensitivity to like abortion, infanticide, and euthanasia.

Conjoined Evils

Organ donation is a great advance in medical practice. Many lay people do not realize that a donated organ must be “fresh” and not affected by the deterioration of death. That means the organ(s) must be removed from the donor very quickly after death. Minutes is the ideal.

Those who promote organ donation fully understand this timing and work to conjoin organ donation with a ready source, assisted suicide and euthanasia. (organ donation and brain death, is another questionable conjoining.).

[Westley Smith expands on this issue](#), bringing home the problems which this conjoining causes.

Fun in the Womb

[This video and article](#) are absolutely moving and spectacular. The video is an MRI of a 20 week baby in the womb, moving and having a great time.

These ten seconds will warm your heart and tickle your funny bone.

Abortion Pill

Chemical abortion is reversible!

Chemical abortion is done with not “a pill” but a combination of two chemicals (pills). First is mifepristone which blocks the effect of progesterone which leads to the death of the baby. Then, a second, misoprostol, is required to induce labor.

Abortion Pill Reversal is available to mothers who change their minds after taking the pills and decide not to go through with the abortion.

Hundreds of babies have been saved using this reversal. Read about [‘Giselle’](#) who is now alive and well and part of a very happy family, and see [here](#) for more detail on the actual process.

How Obvious!

Is it a child or is it not? [Here are 307](#) words which approach the question from a slightly different view.

Yes, it really is a child.

Why?

It appears Oregon’s government is not satisfied with the present participation in assisted suicide. The [legislature is trying again](#) to pass a bill which will allow mentally ill people to be starved to death.

Why are the pro-death promoters so intent on inducing death throughout every time of life? Perceived over-population and personal autonomy seem to head the list of reasons.

Actually, the increasing removal of God from society generates thinking which is built on sand.

Why Should I be Pro-life

If there is a doubt, defer to the action which has the greatest good.
