“God Created the Heavens and the Earth” (Gen 1:1)

PP Funding

Why is there so much time spent on defunding Planned Parenthood (PP)? Do they really get so much taxpayer money?

Well, yes they do. According to a [GAO report](#), they have received more than \$1.5 billion dollars of taxpayer dollars over a three year period.

Imagine the benefit to the babies if that was stopped. Even more, imagine the benefit if that money was spent to support Pregnancy Care Centers.

Why Must We

REINSTATE GOD

To Schools, Homes, & Work

Human desires and values are not sufficient to address today's problems.

AMA

Cheers for the American Medical Association (AMA). Their Ethics Committee has reviewed proposals to allow/promote assisted suicide. They found proponents to be disingenuous because they hid their true intentions, hiding behind and misusing words. Thus, they have [refused to change their opposition to assisted suicide](#). (See the conclusions and recommendations.)

Pampers Strikes Again

We are not advertising Pampers. But, it is impossible to ignore their beautiful ads. [Here is another great one.](#)

Quote Without Comment

“The Golden Rule reorients our moral thinking by putting ourselves in someone else's shoes. [It directs our concern to others](#) who matter just as much as we do. It tests the consistency of our actions to ensure we do not mistreat other people.” (Paul Stark)

A Reminder

Several years ago we included [this video](#) (describing D&E abortion) in this newsletter. It is proper to include it again as the abortion industry is very active in the courts and in the media, promoting itself.

They would have us believe D&E abortions are innocent and simple and without consequence.

Natural Death

Dying naturally should not be equated to dying without dignity or dying so as not to become a burden to family and friends. We are all going to die; it's a part of life. Painting death with negatives and darkness and hopelessness is not God's way.

Giving in to the doom and gloom is not the answer.

There are [many options and people ready to help](#) in those times of need.

NARAL

NARAL pro-choice America, released their [“2018 Report”](#) on the *Insidious Power of the Anti-Choice Movement*.

It includes the words “misinformation”, “political influence”, “judicial influence”, “protesters”, and “fake health centers” and a graphic which is so complex it resists any meaningful understanding.

They complain in their opening sentence, “The anti-choice movement has spent decades finding new ways to insinuate themselves into our government, our policies, and our politics.” Except for “insinuate” they are accurate. But, that is what they (NARAL) have done for the past 45 years.

The difference is that pro-life actions prove the NARAL position to be invalid and unscriptable.

Betrayal of Truth

If assisted suicide and euthanasia supporters were truthful and consistent, they would use their professed restriction - that assisted suicide and euthanasia be restricted to the terminally ill - to scream in opposition to the killing of children and the incompetent, now practiced in Belgium and proposed in the Netherlands.

Their silence betrays them. They have no such “professed restriction”. [Their goal is unrestricted killing](#) of those who request it and those deemed “expendable” for any reason or no reason.

In the US, as in many countries, the pressure is on to force doctors to provide assisted suicide.

We must protect conscience rights.

Ethics

Travis Reider Ph.D., bioethicist, says, “having a child is a major contributor to climate change. The logical takeaway here is that everyone on Earth ought to consider having fewer children”.

That is, people are here to serve the environment. The environment is primary, creation came about from nothingness, and there is no God. And, since people are part of the accidental environment, we are subservient.

The illogic is astounding. We are forced to wonder what is the meaning of a Ph.D. and where is the ethics in this thinking?

Humans are not the problem, they are the solution. “Chance” is not the answer. It takes thoughtful intellect to assess problems and create solutions.

Abdicating our God-given capability and responsibility is unacceptable.

It's a Contradiction...

to understand the order in the universe and to deny its intelligent origin.
