Do not be Like the Hypocrites (Mt 6:5)

1 in 11 Million

We hope you have as much joy as we did reading this [wonderful story](#) of a multiple birth.

Kevorkian

While this article by Wesley Smith is depressing, it is so because the movement toward “Kevorkianism” grows like the recent virus.

His article, [Death is in the Air](#), clearly demonstrates the penetration Kevorkian thinking has had in western countries.

Kevorkian believed that life was a “commodity” which needs to be used to benefit humanity.

One of his major goals was to achieve using the organs of those dying to fuel the need for organs for sick patients.

Take a life to save more lives seems to be his thinking.

A Few Facts

In 2012 the Democratic Convention the word “God” had been selectively removed from various places in the party platform. During the convention there were loud and long “boos” from the participants for efforts to reinstate “God”.

Their current publicly espoused position promotes abortion until birth, abortion for all and no reason, public funding of abortion, support for China’s “one child policy”, codifying Roe v. Wade, repealing the Hyde amendment, and funding Planned Parenthood.

Vote Pro-life

Good News

Some events and issues we do not have the space to cover but which remain important.

[Abortionist on dehumanization](#)
[Abortion Pill Reversal Protocol](#)

By the Numbers

There was a time during the early years of the war in Afghanistan when the media gave a nightly count of the deaths. We see similar figures on deaths caused by covid-19. Occasionally we hear the tragic reports of highway deaths and the number of deaths in that calendar year.

All of these are sad and disturbing, causing us to at least ponder the effect on families and the need to lessen those numbers.

What would be the effect of reporting the number of abortion deaths each evening? Would that cause an uproar in society and help bring a greater effort to diminish those numbers.

Surely it would cause a reconsideration of abortion’s validity.

Stand Up for Life

The past few years have seen much pro-life legislation at state and federal levels. And if we are to have such legislation, it is essential that we have pro-life legislators. That is why we aggressively promote “Vote Pro-life” in the time before elections.

Without those legislators we cannot restrain pro-abortion bills and cannot pursue essential pro-life legislation.

And, we are winning in the legislative arena. Your vote and your participation are essential if we are to save the babies.

Vote Pro-life

Was Yours a Boy or a Girl?

[This](#) happened 13 years ago and has probably been said every day since.

Help at Hand

Often when speaking to others on pro-life issues, we are unaware of the impact being made. And, there are times when we are asked questions for which we are not fully confident we have an adequate response.

Neither should make us hesitate speaking up. Nobody has all the answers.

As we have found in our public speaking, we are, not unusually, surprised by our own words. Many times those words are of unknown origin and amaze us by the relevance and impact they have on the subject and person being addressed.

The bible tells us to be willing to speak up since the Holy Spirit is already there, giving us the right words. If we approach the discussion/opportunity with a receptive and open heart we can be confident that Mt 10:19-20 will apply and should be our encouragement to go forward, prepared and confident the Holy Spirit is our shield.

Accuracy

In most of the media, pro-life people and goals are presented in the negative to demean our position. Of course, we present their position in the negative but not for the same reason.

They proclaim themselves to be pro-choice, pro-woman, pro-science, even pro-life, but they are not. They refuse to present all the choices which are available to a pregnant woman. They deny their clients accurate ultrasound and sound biological information. Further, most media intentionally mislead and obscure pro-life actions and intentions.

We, on the other hand, report their actions and intentions accurately. Since their actions are intentionally inaccurate and disruptive, reporting negatively is consistent.

We defend the lives of unborn, infants, toddlers, teens, adults, and aged against abortion, infanticide, assisted suicide, and euthanasia. We protect the living from unnatural death whenever possible.
