## Good indeed is the LORD, Whose love endures forever, (Ps 100:5)

### Huge Victory

On August 18, 2021 the full 5<sup>th</sup> Appellate Court found the District Court and a panel of the 5<sup>th</sup> court to have ruled erroneously and subsequently found the Texas SB8 to be constitutional and removed the injunction.

In simpler terms, the full 5<sup>th</sup> Circuit upheld the law which bans the dismemberment of living unborn children. The vote was 9-5. This case will likely be appealed to the US Supreme Court.

The complete [finding of the court](#) is comprehensive and complex.

### “Heartbeat” Law

On September 1 the Texas “Heartbeat” law went into effect, all obstacles having been resolved in Texas courts and in the US Supreme Court.

The law makes it illegal for abortionists to perform an abortion after a fetal heartbeat can be detected.

Estimates are that the law will save 100 lives each day in Texas.

Planned Parenthood, ACLU, and others filed an emergency petition with the US Supreme Court but it was denied.

THANKS TEXAS.

### My Body My Choice

After these many years of advancing knowledge as seen on ultrasound and heard as heart beats, how can anyone claim that my unborn baby boy is my body?

He is not even of my gender, his blood type is different from mine, his eyes are not the color of my eyes, and he has his father’s hair color.

His father is not my body and my tiny son is a separate body, a separate person.

People who spout decades old and unproven opinions need to face reality and support the miracle of every new person.

### Bad Company

There is surely more work to be done at home. The United States is among six other countries which [allow elective abortions after 20 weeks of pregnancy](#).

The others are Canada, China, Netherlands, North Korea, Singapore, and Vietnam. Not exactly good company.

### Dehumanization

“That is the lesson that the abortion industry teaches. They use the pronoun “it” to refer to a baby in the fetal stage of life rather than ‘he’ or ‘she’.”

“They minimize pre-born life as ‘a clump of cells’, even though ALL of us are really just a ‘clump of cells’. They call actual heartbeats ‘cardiac pulsations’.”

“It’s a crafted language that transforms a *who* into a *what*— and in the process, numbs the conscience to the act of destroying vulnerable life.”

[The whole article is instructive reading](#) for all. (By Bonnie Finnerty, Education Director, Pennsylvania Pro-Life Federation)

### Why Should I be Pro-life

Unborn babies, black, brown, yellow, red, and white,

They all matter in God’s sight.

### It’s Obvious

In his usual way, [Paul Stark makes it clear](#) that the pro-abortion claims of “choice” and “free will” are illogical and self-serving.

### Action

Pray to eliminate the conditions which lead to abortion.

### Rh Negative

The abortion industry and the ACLU have, again, joined forces against the best treatment of American women.

In an [article in the Washington Examiner](#), presenting the need for Rh negative testing and treatment, we learn that Planned Parenthood and ACLU are working diligently to eliminate Rh negative testing and treatment even though it can result in the death in second and subsequent births.

This is just one more example of promoting abortion to the exclusion of proper and essential medical care of mothers and unborn children.

### Induction Abortion

“[Induced abortion is the termination of a pregnancy by artificial means](#). In the United States today, more than one in five pregnancies end in induced abortion.

In an induction abortion, the abortionist may inject digoxin into the unborn’s heart to kill her and then induces labor to deliver the intact dead baby.

The University of Pittsburgh is doing research on a variety of human/animal interactions and wanted “fresh” human organs, in this case kidneys.

They put in their order and some compliant abortionists performed induced abortions without first killing the babies.

Thus, these abortionists [“are allowing babies, some of the age of viability, to be delivered alive, and then killing them by cutting their kidneys out.”](#)

The University of Pittsburgh is already being scrutinized. [There are many seeking more information, demanding an investigation, or asking for a cease-and-desist order.](#)

There are even indications the federal government may be involved in funding and authorizing.
